DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Species I (claims 1 and 2) in the reply filed on 07/30/2008 is acknowledged. The traversal is on the ground(s) that if the generic claim is allowed, applicant will be entitled to a reasonable number of species claims that include the limitations of the generic claim. This is not found persuasive because in this case as indicated on the previous restriction required, there is NO generic claim. Note that each restricted species is representing different invention.

The requirement is still deemed proper and is therefore made FINAL.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The disclosure is objected to because of the following informalities: in the filed specification; page 10, line 20; delete "7B" and instead insert --7A--;

In many pages of the specification "... " is not clear what for; maybe such "... " need to be deleted; see for example page 10, lines 19, 22, and 24; etc.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Art Unit: 3721

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the continuously pulled-out wrapping paper" in lines 7 and 8. There is insufficient antecedent basis for this limitation in the claim.

In claim 1, line 10; "upward and downward movable" is vague and indefinite as it is not clear movable upward and downward in respect to what?;

In claim 1, line 11; "by its own weight" is vague and indefinite as it is not clear what applicant is referring to by "its own weight"; which weight?;

Claims 1 and 2 are vague and indefinite as both claims are referring to a tension application for applying tension to wrapping paper, but unclear how such tension will be applied and achieved to the wrapping paper?; etc.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 3721

Claims 1 and 2 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 2 of prior U.S. Patent No. 7,395,944. This is a double patenting rejection.

Claims 1 and 2 rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-3 of prior U.S. Patent No. 7,228,988. This is a double patenting rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 the best understood are rejected under 35 U.S.C. 102(e) as being anticipated by Knoerzer et al. (U.S. Pub. No. 2003/0009989).

Knoerzer discloses a packaging device with the use of tension application mechanism to pull out the wrapping paper (Fig. 1; via tensioning rollers 114); the tensioning rollers depressing the wrapping paper (via pulling the wrapping paper); the rollers disposed in an operation section (via the section in which the rollers are positioned) and being slid-ably engaged in a vertical rail (Fig. 1; via such rollers installed vertically on a machine frame; broadly could be considered as a rail and the rollers slide/installed on the frame).
